

BenchMark

Control Valve Diagnostics™

Data MGR

BenchMark Data MGR is a comprehensive software tool designed to complement the application of *BenchMark Control Valve Diagnostics* within your facility. It has been designed with the user in mind. While full featured and powerful, it remains easy to learn and easy to use.

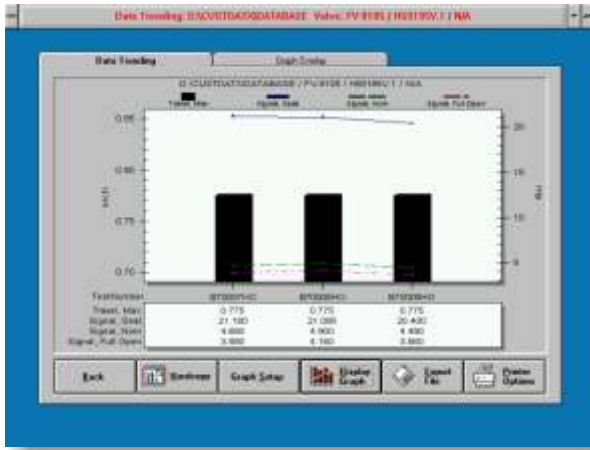

Put your data to work !

Key Functions

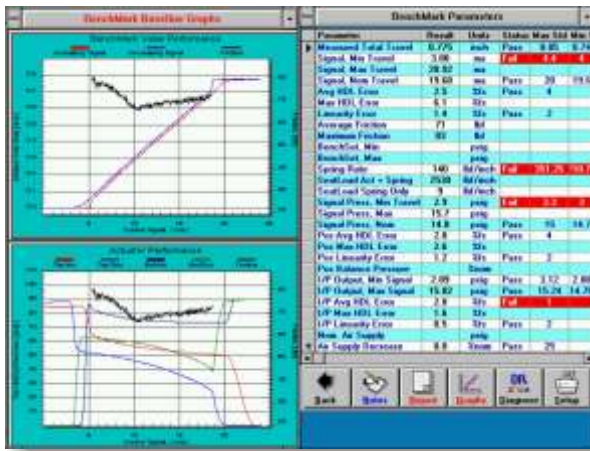

- Trend Test Results
- Overlay Test Graphs
- Enter / Edit Valve Records
- Recall Test Results
- Print Test Results
- Export Test Results
- Set Valve Specific Standards
- Review Data Tables

System Requirements

- Windows® 3.11, Windows95®, Windows98® or Windows NT 4.0®
- Minimum of 32 MB Ram recommended.
- Approx. 10 MB disk space required.
- 100 MHz Pentium® Processor or better

Trend Multiple Engineering Parameters

Recall and Review Test Results

Model	Set Pt	Model	Signal	Relay or Status
WALTER DOUBLE	MODEL 25	23.70	22.37	
WALTER DOUBLE	MODEL 25.1	23.70	23.07	
WALTER DOUBLE	MODEL 50	47.17	46.07	
WALTER DOUBLE	MODEL 50.6	47.17	46.26	
WALTER DOUBLE	MODEL 50.4	47.17	46.07	
WALTER DOUBLE	MODEL 100	94.02	91.06	
WALTER DOUBLE	MODEL 100.6	94.02	91.06	
WALTER DOUBLE	MODEL 100.8	94.02	93.28	
WALTER DOUBLE	MODEL 200	188.03	182.23	
WALTER DOUBLE	MODEL 200.4	188.03	188.7	
WALTER DOUBLE	MODEL 300	282.04	282.7	
WALTER DOUBLE	MODEL 400	376.05	365.8	
WALTER DOUBLE	MODEL 500	470.06	459.8	
WALTER DOUBLE	MODEL 600	564.07	563.1
